## **PATENT/TRADEMARK:**

United States Patent Number: 5,279,540 - Michael H. Davidson, M. D., F.A.C.C.  
Date of Patent: January 18, 1994.

**Abstract:** A method for reducing the risk of atherosclerosis in a patient at risk of same comprising the steps of removing cholesterol ester transfer protein from blood of the patient to reduce the plasma CETP levels in the patient. In an embodiment, the method includes the step of passing the patient's plasma through an apheresis machine to remove at least some of the plasma cholesterol ester transfer protein.
